

## Mixing Instructions

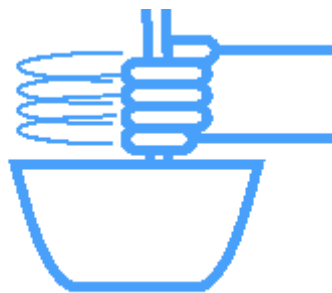

Faux Snow is amazingly easy to mix and maintain! Just follow these simple steps and you'll be able to enjoy Faux Snow in minutes, and it will last for days!

Put one teaspoon of Faux Snow in a clean bowl.

Add 1/2 cup of water and watch it slowly turn into snow!

Stir a few times until most of the water is absorbed.

Gradually add up to 1/4 cup water until you get the consistency of snow you prefer.

## MAINTENANCE

Faux Snow should be misted and "fluffed up" every few days. Add just enough water to restore it to its original look. "Wetter" snow will need less misting than dryer snow.

## DISPOSAL

Add Faux Snow to any garden or potted plant soil and it will help the soil hold moisture. If spilled, it's easy to vacuum up. Faux Snow does not stain surfaces and is environmentally friendly.
