

SnowMasters Technician Course Description and Enrollment Information

Course Description; The Snowmaster tech course, being conducted by certified snowmaster technicians, is a 2-day course. The course includes hands on training for the maintenance and optimum operation of all of our evaporative snow machines. To include things such as; the basic workings, placement of machines, importance of flake size, control of the flake, “teching” a machine, lighting the snow, movement of air, fluid consumption and placement of machines, just to mention a few.

Who should attend; while geared toward technicians, the course is open to any individual who desires a more extensive knowledge of the operation of our machines.

Course Duration and Schedule; we presently are offering two sets of dates. The first class will be held on September 9 & 10, 2008. All registrants must arrive by 10:00am each day. The duration of the class will be to 4:00pm each day.

Enrollment; Technician course enrollment form must be received by Snowmasters in order to receive enrollment confirmation.

Tuition; NONE, as we are pleased to offer this informative training
